i think that is right. They are on site to support the University Avenue rebuild project. They are moving their cables and installing them in a new duct bank. NYSEG and Verizon do all the work on their assets.

**Subject:** Verizon work near Johnson Museum

Hi,

At a meeting today with the BTC, Chuck Smith raised an issue about Verizon building forms and pouring cement around their conduit at the retaining walls near the Johnson Museum and construction work along Univ. Ave. It may be that they have a right of way and can do this work which is what David Marsh thinks may be the case. Any clues?

Thanks,

**Alan L. Mittman**

Hi David,

Just following up on Chuck's inquiry about Verizon building forms and pouring cement around their conduit at the retaining walls near the Johnson Museum and the construction work along University Ave. Our information confirms your suspicion that they are on site to support the University Avenue rebuild project and are moving their cables and installing them in a new duct bank. NYSEG and Verizon do all the work on their assets.

John will be at the Thursday meeting if you have further questions.

Best,

Alan
